LAVASSA 30L, SS A546

Before you install.

PREPARATION

01 Ideally, install stainless steel cleaners sinks after all other building activities that could contaminate the stainless steel surface are complete.

02 These activities include using proprietary mortar removers containing hydrochloric acid, and welding, cutting or grinding that may spray carbon steel and iron particles onto the surface.

BEFORE YOU START

01 Remove the sink from the box packaging and inspect it for damage before beginning installation.

02 Confirm all requested details are correct.

03 If the sink is damaged in transit, or any details are not as requested, do not install it. Notify your retailer within 24 hours of receiving the product.

LAVASSA 30L, SS A546

Installing the sink.

INSTALLATION STEPS

01	Mark a level, horizontal line on the wall at the desired installation height. 630mm is recommended.
02	Measure the width of the sink, mark the hole centres for the brackets, then secure the brackets to the wall with the supplied bolts.
03	Slide the sink onto the brackets and fix it in place with silicone.
04	Install the supplied waste into the sink.

CARE AND MAINTENANCE

CLEANING MATERIALS

A soft cloth, a soft-bristled brush, or a natural or artificial sponge

CLEANING SOLUTIONS

Hand washing soap and soft water, or mild soap and soft water

Clean stainless steel surfaces weekly, or as soon as a build-up of surface media is seen. Wash with warm, diluted, mild soapy water using a cloth or soft bristled brush. Once all dirt, oil and grime are removed, rinse thoroughly with clean water and wipe dry.

Avoid waxes, solvents, abrasives, acids and other chemical based cleaners. Never use steel soap pads, steel wool or wire brushes, as particles can adhere to the surface and rust. The warranty is void if damage is caused by unsuitable cleaning products.
